

# NetworkImplementation

## Network Implementation will optimize your IT investment.

Harland Technology Services has a Professional Services Team that will ensure a smooth network installation. Whether implementing new, or adding equipment to an existing network, Harland Technology Services can develop a customized implementation plan that's right for your business. Harland Technology Services' Solutions include analysis, hardware procurement, staging and configuration, testing and onsite installation.

*Networks may evolve, but they should always follow sound network design fundamentals.*

Our business is to provide you with a high-quality wide area network (WAN) and/or local area network (LAN) designed, implemented and maintained to satisfy your system needs today and tomorrow. Not a "cookie cutter" approach, but a network tailored to your requirements

### Highlights

- Nationwide, Onsite Service
- Consultation, Configuration, Installation, Network Support and Maintenance

When you select Harland Technology Services for your network needs you get:

- An organization with strong credentials in network management solutions
- In-depth understanding of application interdependencies
- Accountability for a turnkey solution with optimal performance
- Lower Total Cost of Ownership
