

Security Services

Security Services will protect your business.

Compliance and information security risk continue to be top-of-mind issues for CSOs and CIOs when it comes to network security. Much of this concern stems from the growing sophistication of cyber attacks and the multitude of ways they are being launched. There are so many entry points on today's network, that today's security defenses need to be more comprehensive than ever before.

We offer a suite of services designed to improve the security of your network environment and give you peace of mind.

Our customers have trusted us to handle their network support for over 40 years. Harland Technology Services has the expertise and solutions you need to address your security concerns and support your network infrastructure.

Let Harland Technology Services protect your valuable information, networks and systems.

Highlights

SYSTEM SECURITY ANALYSIS is a comprehensive review of a client's network security, which is delivered by our trained security experts and produces a report and provides recommendations for the client.

MANAGED FIREWALL SERVICE provides intrusion detection, prevention and reporting capabilities via management of network traffic through a state-of-the-art firewall.

WEB CONTENT FILTERING works in conjunction with our Managed Firewall Service to provide management of web traffic through the firewall.

GATEWAY ANTI-VIRUS works in conjunction with our Managed Firewall Service to provide protection against malware at a network's perimeter.

HOSTED SPAM FILTERING stops spam and associated malware before it reaches a client's network by routing inbound and outbound email traffic through an adjustable filter.

REMOTE VULNERABILITY ASSESSMENTS provide monthly, remote tests of a client's perimeter security and deliver formatted reports to the client as proof of network testing.

INTERNAL VULNERABILITY ASSESSMENTS leverage onsite hardware and software to compare a network's vulnerabilities against a known database and produce vulnerability reporting for prioritized remediation.

Contact Harland Technology Services at 800.228.3628 or talk to your Harland Technology Services Sales Representative to see how we can help turn security concerns into security solutions.
